Mondays, Feb 27, March 5 & 12

WHAT IS SKYPE? (USS/MWS)

Tuesdays, Feb 28th & March 6

CREATE A BUDGET IN EXCEL NEW NEW NEW!!

So, you know that Excel is a number crunching program, but did you know that you can create your own budget? This class will teach you the basics of Excel and then you will learn how to create a custom budget to meet your needs!

TROUBLESHOOTING

Come see how to troubleshoot your PC and fix it! Is it a hardware problem or software or combination of both? This class is almost entirely hands-on; students are given supervised time with actual broken equipment, are taught to work inside a computer and how to work with Windows and the Internet to fix almost any problem.

CONNECT YOUR HOME PCS

Learn how to network home computers to share resources including printers, internet service, and files. Students will also learn how to properly configure home network devices such as wireless routers and how to secure their network with firewalls and encryption software.

CREATE YOUR OWN WILL

Do you have a will? Have you been putting it off because you don't want to hire an attorney, and you really don't want to think about it. Well, now is the time because it is so easy. Come to this class and learn the different packages available to use and begin creating yours today! Don't let the court decide the outcome of your estate! Don't delay the distribution of your assets to your loved ones! Take just a few minutes to write your Last Will and Testament today (CEI is not offering any legal advice in this class, we are showing you how to use pre-designed software to create a will).

QUICKEN 101

Having trouble finding out where all your money went? Could you have really spent \$5,000 on groceries? Come to this class and learn how to use the computer to keep track of all your bills, checks, deposits, etc. You will get a trial copy of Quicken with this class.

MAKE YOUR OWN PHOTO T-SHIRT NEW NEW NEW!!

Bring in your photos and we will show you how to create your own custom T-shirt (or sweat shirt). Learn the process of applying thru a press. Make a collage, or maybe that special baby's first step shirt. Whatever photo is your favorite, we will help you create a keep-sake shirt!

NO MORE CABLE BOXES

Today's music and video content is increasingly focused on digital downloads and streaming data rather than traditional store-bought CDs, DVDs and Blu-Ray discs. Many home users would like to be able to access their music, movies and pictures from any room in their home, or on their big-screen television rather than whichever computer happens to have those files. Users will learn about internet-based media services and the variety of ways they can be accessed from computers, phones, game systems and dedicated set-top players.

WHAT IS SKYPE? (NEW NEW NEW!!)

So you hear people talk about Skype, but do you know how to use it, or what it is? Come to this class and you will be "skyping" in no time! You will also learn about OOMA, a voice over IP. Unlike Vonage or Skype, there is no pay-as-you-go. You buy the hardware and you are done.
