Case Management Pro **All New** Completely Web Based

Case Management Pro

is a powerful and feature-rich case management and reporting system designed to improve the effectiveness of staff and management at every level of your organization.

Better Case Tracking

Case Management Pro helps your organization improve efficiency in day-to-day tasks, such as assessments, case notes, tracking client progress, measuring outcomes, providing referrals, and more. Case Management Pro provides a cost-effective, baseline software product that can be easily configured to how you work. As your organization changes, Case Management Pro will grow with you and help you achieve new levels of efficiency, transparency and accountability.

① Data Conversion/ System Integration

Knowing detailed information about the customers you serve is critical to meeting individual care needs. Your customer's data may be located in other software products or in paper-based systems. Computer Education Institute's technical service team can help you move data from your existing systems into Case Management Pro.

② Customer Support

Computer Education Institute is committed to providing the highest level of customer support. We are a local company committed to our customers.

③ Customizable

Case Management Pro can be customized to work how you work. Because no two companies are alike, Case Management Pro was developed in independent units so you can pick and choose what works for your company.
